20,000,000 Freedom Vegetable Gardens is recommended by Secretary of Agriculture Anderson, as the minimum goal for 1948. The produce from these gardens can take the place of many foods vitally needed for export. By helping himself to meet increasing living costs, the home gardener will be helping his own community to make a precious contribution to a hungry world. Make your plans early.

New and Rare Items for Your Kitchen

Thermic Ray

STAINLESS STEEL, COPPER-BOTTOM COOKWEAR

Made of stainless steel; copper bottom; with vapor seal. Heavy enough for long life, yet light enough to handle with ease. Air-cooled handles and knobs designed to grip your hand even when it is wet and soapy—plastic, to withstand normal oven cooking temperatures. Copper bottom is the best-known conductor and distributor of even heat. The copper is welded to the steel forever in a thickness equal to

the steel itself. The vapor seal, which is exclusive with Thermic Ray Cookware, has a turret lid that sets into a special rim; seals in flavors and food values. Permits low water cooking. Thermic Ray Cookware remains mirror-shiny; is resistant to dents, scratches, food acid stains. Interior rivetless, for easy cleaning.
